# emPower Foundation

⟶ Ready library of data connectors for automated data replication

Building data connectors from scratch requires complex data engineering skills and is often time-consuming process adding to overhead expenses. emPower Foundation is the trusted and reliable platform accelerating your data ingestion journey.

Leverage pre-built data connectors automating intensive connectors building processes and freeing up data engineers' bandwidth and benefits from immediate cost savings.

↳ **40+ Data Connectors**

↳ **Real-Time CDC data replication**

↳ **Support all data formats**

↳ **Automatic schema mapping & drift handling**

Benefits

→ Setup production-grade data pipelines in minutes

→ Significant cost savings

→ Management console for managing enterprise-wide data connectors providing seamless controls on data connectors

→ Enables enterprises to scale rapidly with plug and play approach. Jumpstart data modernization projects in few clicks

→ Replicate data across your data ecosystems securely

→ Automated data replication eliminating manual maintenance

List of Supported Sources and Destination

Choose supported data sources and destination from growing library of 40+ connectors
